WORK EXPERIENCE

Juego Studios - Game Design Intern

Apr 2026 - September 2026

• I worked on Game Design Documents (GDDs), feature documentation, Design Sheet, wireframes, and gameplay specifications in collaboration with senior designers and stakeholders.
• I Designed and documented four PlayPad-based games for a platform, including gameplay flows, UX wireframes, balancing, and QA validation.
• I Conducted the gameplay reviews, feature validation, and balanced gameplay to improve player experience while translating client requirements into implementation-ready specifications.
• I Contributed to a Digital Card Game by documenting core gameplay systems, AI behavior, progression, scoring mechanics, onboarding flows, and UX wireframes, Worked in GDD and Wireframe.

Key Projects:

- **Interactive TV Gaming Platform –** Contributed to game design, gameplay documentation, UI flows, and PlayPad (IoT) controller integration for 4 2D games developed for the TV gaming hub. Worked on gameplay flow, feature validation, and Tested gameplay features across various scenarios to identify bugs, inconsistencies, and edge cases.
- **Digital Card Game** – Worked on Game Design Documents (GDDs), gameplay rules, wireframes, user flows, and feature documentation.
- **Hybrid Casual Games** – Worked on 7 multiple hybrid-casual games, contributing to level design, gameplay balancing, iterative design improvements, and FTUE development to improve player onboarding and overall game flow.
- **Hoga** – Assisted the Lead Game Designer with gameplay and flow testing, identifying issues and suggesting improvements. Also researched and sourced suitable audio assets from online sources to match the game's tone and gameplay.
- **Beat 'Em Up Fighting Game** – Conducted gameplay and flow testing to identify design and pacing issues. Researched and sourced suitable sound effects and audio assets to support the game's combat experience.
- **AAA-Style First-Person Action Game** – Assisted the Lead Game Designer with level design by identifying, organizing, and placing appropriate level assets to support gameplay flow and level composition.

- **AR + 3D Open-World Game** – Assisted with greyboxing and level design, contributing to the early blockout and layout of gameplay spaces while supporting level flow and player navigation.

PROJECTS

Square **Game Designer, Game Programmer.**
A minimalist puzzle game where players strategically navigate a square to the goal by stepping on each tile only once.

Skyward Dash **Game Designer, Game Programmer, Level Designer.**
So you think you're smart? This puzzle game will prove you wrong. Push, step, and bend reality—just don't expect logic to save you.

Fear In The Mind **Game Developer, Level Design, Game Designer.**
"**Fear In The Mind**" is my first ever 3D psychological horror game. The game aims to evoke a sense of fear and confinement, immersing the player in a claustrophobic environment.

Bricker **Game Developer, Level Design, Game Designer.**
A quirky action game where players collect resources, avoid enemies, and activate King Mode to complete each level.

2 Steps Ahead? **Game Developer, Level Design, Game Designer.**
A puzzle game developed for the **BYOG 2025 Game Jam (Think, Mix, Make)**, where players strategically manipulate blocks to create a path to the exit.

DemonFall: Endless Hunt **Game Designer**
A **wave-based roguelite** developed for a college **game jam**, featuring temporary upgrades, permanent progression, and fast-paced combat that earned a **Top 10 finish**.

Patch Notes **Game Designer**
Designed Patch Notes, a 2D puzzle-platformer for **BYOG 2026** featuring dynamic gameplay modifiers across 10 levels; secured **Runner-Up in the game jam.**

EDUCATION

B.sc (Hons.) in Computer science and Game Development **2022 - 2026**
Backstage Pass Institute of Gaming and Technology

Bachelor of Design in Process Engineering **2019 - 2021**
Sri Chaitanya
